Greetings,

I am currently the Information Technologies Director with the Louisiana Public Service Commission, I have been employed in this capacity for the past 20 years. In addition to managing a staff of IT professionals my other duties are listed below.

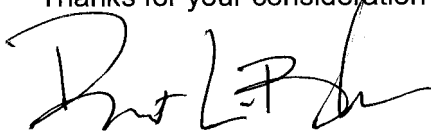

Provide management of all projects carried out by I.T. personal, contract consultants, maintenance and service providers. Identify future beneficial technologies and secure financial and human resources to exploit. Develop contracts, statements of work, requests for proposals and lead evaluation teams. Develop and consult with the Executive Secretary on the Information Technologies budget and strategic plan.

I am considering retirement from civil service soon and becoming a sales representative for a software development company, Dorger Software Engineers (DSE).

The La Public Service Commission contracted with DSE to develop a Case Management System (CMS) in 2018, that system has been delivered and has been in production since December 2020. The LA PSC will continue to work with DSE under a standard annual maintenance agreement providing software updates and bug fixes for our CMS.

If approved by the board I will have zero interaction with the LA PSC, my responsibilities to DSE will be to attempt to gain an audience for DSE to demonstrate their suite of products to other Government agencies which will include other State Public Service Commissions.

Thanks for your consideration in this matter,

Brent LeBlanc
